

WXHP 120 Preheating plate

To preheat circuit boards under repair or assembly and reduce the potential of thermal damage by excess heating from a soldering iron.

Code-Number: T005 27 029 99

ESD Safe

Will not damage or degrade sensitive components and is safe to use in protected assembly areas.

Now even more Power!

50% more power to increase its effectiveness in high thermal demand requirements.

High Performance

Efficient thermal energy transmission and heat delivery maximises performance.

Internal data storage

Operating parameters are stored on the WXHP 120 tool to facilitate use of the tool with other WX stations.

Process control

WX technology provides convenient and precise handling of the operating process and guarantees the end result.

Technical data:	
Dimensions L x B x H	150 x 120 x 65 mm (5,90 x 4,72 x 2,55 inch)
Heated surface	80 x 50 mm
Voltage	24V
Power consumption	120W
Temperatur range	50°C - 200°C
Connectable to	WX 1, WX 2, WXD 2, WXA 2
