Overview

For use with the ARX STEM Video Based Curriculum, this is a 320 page student text book (without access to the online instruction). Use this option when you need hard-copies of the book available for students while using a school license for online access (ARX-TPLAB). For both the text book and online access, order ARX-SSBL.

Topics Include

- Overview of the ARX STEM Curriculum
- Getting to know the ARX ASURO Robot
- Learning to think and act like an engineer
- Prototyping with breadboards
- Soldering PC boards
- Power supply, status, collision detection, motor control, encoder, line following, micro controller, and IR com link circuits.
- Step-by-step assembly instructions
- Test procedures
- Introduction and essentials of C programming
- Program uploading guide
- Sample programs
- Line following competitions
- Collision detection competitions
